Anyone have a part number (OEM or aftermarket, don't care which) for the vacuum reservoir that sits in the driver's side fender well? The Doorman t-case vacuum switch I put in last year already failed...so now I'm purging the system of fluid for a 2nd time. They must be calling these things something besides "vacuum reservoir" or "cannister" because I can't find them on the GM parts websites, Rock Auto, etc.

Thx.

UPDATE: Think this might be #15720833 - [component #16](#) (TANK. AIR CONDITIONING (A/C) Vacuum Control).

Correct?

yes i believe that is what it is. it is not specifically for the 4x4 vacuum system. If I need a vacuum res I make my own out of 3" pvc pipe and a couple caps. drill one end and tap it for a nipple.

Bigger tires and traction adders just means you get stuck in more inaccessible places.
